USB Input Tool Interface Box

Item number: 264-020

Images

Description

The input tool allows you to directly connect Digimatic measuring devices to a USB interface, without needing additional software.
The USB Input Tool Direct offers the following benefits:

- Measurement data is converted into keyboard codes, enabling interaction with any program working with keyboard entries. (HID)
- You can also connect to a USB with fixed COM assignment in Microsoft Windows as a channel identification (VCP).
- The driver for creating the VCP is part of USB-ITPAK and is available online.
- The USB-ITPAK software lets you easily create Microsoft Excel worksheets.
